

# An Invaluable Partnership

## CHILDHOOD CANCER RESEARCH DATA SHARING INITIATIVE

The International Cancer Research Partnership (ICRP) is a unique alliance of cancer research organizations that shares funding information to **enhance global collaboration** and **strategic coordination of research** between individual researchers and organizations.

## ICRP Comprehensive Database

The ICRP comprehensive database is a library of studies funded by cancer research organizations from around the globe, including Australia, Canada, France, Japan, Netherlands, United Kingdom and the United States. Collectively, it houses over \$70 billion in cancer research studies from 137 distinct organizations, and is a powerful conduit to facilitate collaboration between organizations and avoid duplication.

### Unique Features

- Comprehensive Structured Search Functionality**  
 Users can easily search childhood cancer projects by year, organization, city, country, CSO, cancer type, keyword, project type, PI Name, or even research awards using defined criteria, etc.
- Mapping Interface – NEW!**  
 Statistical layers allow partners to quickly see project locations around the world.
- Future Funding Tab**  
 This unique tab shows upcoming projects being funded. Currently there are 238 childhood cancer projects starting after 2020. This type of foresight can be used to predict future trends and facilitate proactive collaboration between organizations.
- Analytical Tools**  
 This function provide access to funding data that can be viewed, exported in Excel or downloaded to charts to help organizations analyze the international portfolio for strategic planning purposes.
- Networking Tool**  
 CAC2 Members have access to a members-only blog to share best practices and educational materials, answer questions, exchange documents, etc.
- Topic-specific Data Reports**  
 CAC2 Members have access to a library of data reports published by the ICRP, which highlight specific information by institute, funding organization, researcher, funding amount, etc. In these reports, partners can view project abstracts, create benchmark analyses of cancer research funding, and track funding trends of international cancer research.

The ICRP database contains data on **more than 105,000 grants** from **137 institutes** and organizations, totaling **over \$70 billion** and is expanding every month.

## ACCESS YOUR ICRP DATABASE

Follow the below steps to register:

- 1 Go to [ICRPartnership.org](http://ICRPartnership.org)
  - 2 Click “Login”
  - 3 Click “Register” at the bottom
  - 4 Follow instructions (if your organization is not listed: select “CAC2-Coalition Against Childhood Cancer”)
  - 5 You will be contacted by ICRP within 2 business days when your application is approved.
- ★ You are ready to start exploring the ICRP database!

**FREE ACCESS for CAC2 Members!**

## Engage this Unprecedented Resource

### 1 Share Your Funded Research Projects

Since 2015, almost 40% of CAC2 Research Member organizations have contributed 850+ scientific research projects to the ICRP database, which represents 16% of all childhood cancer projects in the database.

With additional data submissions, the ICRP will paint a more accurate picture of childhood cancer research across the world. YOUR continued contributions also ensure that the broader cancer research community recognizes the importance of childhood cancer research.

 All CAC2 members are encouraged to submit their funded research projects to ICRP.

### SUBMIT YOUR DATA OR ASK A QUESTION

**Request a data submission form** or ask us for help in submitting your projects!

Email [research@cac2.org](mailto:research@cac2.org)

### 2 Conduct Your Own Research

Through comprehensive data search and analysis capabilities, CAC2 members uncover powerful insights and gain a deeper understanding of:

- » Trends in cancer research funding
- » Research areas being funded (CSO), e.g. clinical, basic, translational, survivorship, etiology, etc.
- » Funding profiles across different countries and organizations
- » Gaps in funding for certain types of cancer research
- » Ideas for maximizing research efforts
- » Identifying opportunities for strategic collaboration between funding organizations

### NAVIGATE THE ICRP DATABASE

**Watch a webinar** to learn how to easily navigate the ICRP database\*

Visit [cac2.org/analyzing-the-international-cancer-research-portfolio-icrp](http://cac2.org/analyzing-the-international-cancer-research-portfolio-icrp) to watch the webinar

*\*This webinar also includes an overview of data caveats and restrictions, as well as links to further resources.*
